Sun Smart Policy

The skin protection policy is in place from the beginning of September until the end of April and when the ultraviolet radiation (UVR) level is 3 and above at other times.

All students and staff are expected to wear a hat that gives good cover to the face, neck and ears whenever they are outside during the months specified above and when the UVR level is at 3 or above outside of these times.

Broad brimmed, legionnaire or bucket style hats with a deep crown and 6 cm brim are recommended. Baseball caps are not permitted.

The school dress code includes polo tops with collars and sleeves for additional protection.

All adults are expected to set a positive example by wearing sensible clothing and hats while on site or excursion.

Students are actively encouraged to use available areas of shade for outdoor activities. Instances of inclement weather (including extreme temperatures) will be managed according to the school's **Inclement Weather Policy**.

Students who do not have appropriate hats will be asked to play in an area protected from the sun.

The use of SPF 30+ broad spectrum, water resistant sunscreen is actively encouraged and is available in each classroom. Coloured zinc cream is not appropriate.

The Manoora Primary School Sun Smart Policy is based on the Cancer Council of South Australia's Sun Smart Primary School Program checklist provided on their website at www.cancersa.org.au.
