Inquiry Based Learning Guidelines

Manoora Primary School has a strong focus on Inquiry Based Learning.

Inquiry skills are embedded in the Australian Curriculum.

The aims of an Inquiry learning approach are to:

- Develop the students' ability to pose questions and plan, research, investigate and search for answers and solutions.
- Develop the skills needed to convert information and answers into useful knowledge that can be applied to new situations and prompt further learning.
- Provide students with different ways of viewing the world, communicating about it and successfully coping with the questions and issues of daily living.
- Develop an understanding that all knowledge changes over time as people challenge, shape and contribute to it.
- Demonstrate that there are often multiple perspectives for looking at, analysing and understanding things.
- Provide learning opportunities that are more relevant as concepts are learned in context and relate to existing knowledge and experiences.
- Encourage students to become independent, resourceful and responsible learners.

Our students are supported to develop the skills of questioning, research, communication, and social and self-management. Each student can progress and build on their skills and unique abilities and enjoy the world of learning. Students are taught to critically examine the information they are presented with and collaborate with others to work in teams and independently. Students are also encouraged to be resilient when solving problems and to face challenges using a "Growth Mindset".
